

KENZ

CRANES

**WITH OUR PASSION
YOU CAN LIFT
ANYTHING**

Demanding conditions call for exceptional solutions. For over thirty years, Kenz Cranes has influenced the state-of-the-art by developing groundbreaking technologies and designs for the offshore industry. Our passion and dedication is inherent in everybody who works for us and is applied to every piece of equipment we produce. Our cooperative working methods have achieved success for a broad worldwide clientele in a diverse range of environmental conditions, helping with everything from lifting deeply submerged underwater equipment to installing offshore wind turbines.

From our standard high-end designs to custom-made hoisting and lifting solutions, everything is conceived with customer satisfaction at its heart. And built to deliver the highest possible levels of safety and dependability. Because Kenz Cranes are manufactured from start to finish at our own dedicated facility in Zaandam, our passion for excellence is realised through every element of our work.
